BOROUGH OF DEVIZES

PUBLIC HEALTH DEPARTMENT,
NORTHGATE HOUSE,
DEVIZES,
WILTSHIRE

To the Mayor, Aldermen and Councillors of the Borough of Devizes.

In presenting my Annual Report on the health of the Borough, in respect of the year 1969, I am pleased to point to the fact that the year was not notable for any remarkable incidence of disease. This is naturally as one wishes it to be.

Infectious diseases, formerly the cause of so much morbidity and mortality amongst the community have, as a result of such factors as the development of prophylactic immunisation and drugs combined with favourable environmental changes, diminished in frequency and gravity. With the passage of time and further developments this favourable trend should continue.

For the first time in any one year for which figures are available, the number of births reached 200. The increase is a reasonable expectation having due regard for the increased population. Compared to last year there was a small reduction in the total number of deaths of which the most common causes were Coronary Thrombosis and Cerebrovascular disease. This is in line with the pattern established over recent years.

I am pleased to report the opening and full occupation of a Group Dwelling for the elderly. This is a two-storey building consisting of 16 single and 14 two person units of accommodation. It is under the supervision of a resident Warden. This goes some way to catering for the needs of the ever-increasing number of the no-longer-young in the community and does credit to all concerned with its planning and construction.

During the year modern apparatus was installed in the swimming pool for the purification and heating of the water. These improvements are much appreciated by the swimming public whose numbers should continue to increase in the years ahead.

The year saw the cessation of the sale of unpasteurised bottled milk in the Borough. Such an event probably went unnoticed by the majority of the community but it nevertheless represented a big step forward in Public Health.

As mentioned in my reference to the number of births, there has again been a sharp rise in the population of the Borough. From figures supplied by the Registrar General it appears that the population has gone up by 900 in the past year. This appreciable number represents an increase of over 9%. Whilst a continuation of this rate of increase cannot be foreseen in the immediate future, its possibility cannot be discounted.

/Increased

Increased numbers of persons will obviously put increased demands on the existing services and those which come readily to mind as being connected with community health are water supply and sewage disposal. Under the appropriate headings further mention is made of these two important matters.

Additional housing accommodation will be required at a rate commensurate with the rise in population. An increased need for suitable units of housing accommodation for the increasing number of elderly in the community can be foreseen. Whilst the day when there will no longer be a need for housing accommodation for the handicapped and under-privileged cannot be anticipated regardless of our wishes on the matter. The availability of houses will attract people to the Town, whilst the continued demolition of outdated, outmoded and otherwise unsuitable dwellings will increase the need for housing provision. It is to be hoped that as a result of public and private enterprise in the matter of construction that those searching for suitable accommodation will not be forced to search too long in vain.

I foresee the requirement for enhanced medical services in the form of increased hospital accommodation. Such changes as may be indicated in this direction are not within my making and we must hope that those in whose hands the power lies, will see their way to wielding such powers to meet the needs rather sooner than later.

It hardly needs mention here but it is put in for good measure, that our increasing population will require additional medical services in the form of more family doctors to cope with the added work. In this connection also one looks to the future in the hope that Medical Practitioners will be attracted to the Borough in numbers sufficient to ensure that the public never run the risk of being over-doctored or the doctors over-worked.

I wish to express my appreciation to the Public Health Inspector, Mr. K. Wildey, for the services that he has continued to render to the Borough. With the ever-changing and ever-increasing legislation and Regulations, intended to benefit the health of the community, his duties, whilst altering over the years in content, continue to increase enormously in quantity. I am grateful to him for his assistance to me throughout the year and for his contribution to this report.

/During

During the year the Department lost the services of one Junior Clerk and fortunately succeeded in recruiting a replacement after a not too lengthy interval. To them both, for the help they have given to the Senior Clerk/Typist, in the most successful discharge of her duties, I offer my thanks.

In conclusion I thank the Technical Assistant for the good work which he has done and similarly the Rodent Operative. In the latter appointment a personnel change became necessary with the retirement of Mr. Barrett after 15 years loyal and faithful service to the Department and to his native Town.

P.C. BARRY

Medical Officer of Health

GENERAL STATISTICS

Area in Acres				1,420
Population (Registrar General's Estimate)	10,310			
Number of habitable dwellings at 1.4.70	3,142			
Rateable Value at 1.4.70		£437,637		
Estimated Product of 1d rate at 1.4.70	£1,730			

VITAL STATISTICS

Birth and Death Rates per 1,000 population
*Standardised

	<u>Birth Rate</u>		<u>Death Rate</u>	
	<u>1968</u>	<u>1969</u>	<u>1968</u>	<u>1969</u>
Devizes Borough	18.5	18.9	10.8	8.8
England and Wales	16.9	16.3	11.9	11.9
Wiltshire	17.5	17.6	10.9	10.7

*Comparability figures are supplied to each District by the Registrar General. These take into account the varying age-sex distribution of the population in different parts of the country. When applied to the local rates they allow a more accurate comparison to be made between different areas.

Vital Statistics (Contd.)

MOTHERS AND INFANTS

	<u>1969</u>	<u>1968</u>	<u>1967</u>
<u>Live Births</u>			
Number	195	174	138

<u>Early Neo-natal Mortality Rate</u> (deaths under one week per 1000 total live births)	15	5.7	7
<u>Perinatal Mortality Rate</u> (stillbirths and deaths under one week combined, per 1000 total live and still births)	40	22.6	7

*Information not available for 1967 and 1968.

CAUSES OF DEATH DURING 1969

The figures given below are taken from the Registrar General's Annual Report :-

	<u>Male</u>	<u>Female</u>	<u>Total</u>
Other tuberculosis, incl. late effects	0	1	1
Malignant neoplasm, stomach	1	1	2
Malignant neoplasm, intestine	3	2	5
Malignant neoplasm, lung, bronchus	4	2	6
Malignant neoplasm, breast	0	2	2
Malignant neoplasm, prostate	2	0	2
Other malignant neoplasms	2	2	4
Anaemias	1	0	1
Other diseases of blood, etc.	1	0	1
Meningitis	1	0	1
Chronic rheumatic heart disease	1	1	2
Hypertensive disease	0	1	1
Ischaemic heart disease	20	11	31
Other forms of heart disease	4	3	7
Cerebrovascular disease	11	14	25
Other diseases of circulatory system	3	6	9
Pneumonia	6	4	10
Bronchitis and Emphysema	2	0	2
Asthma	1	0	1
Other diseases of respiratory system	0	1	1
Peptic ulcer	0	1	1
Intestinal obstruction and hernia	0	2	2
Other diseases of digestive system	1	2	3
Nephritis and Nephrosis	1	0	1
Other disease, genito-urinary system	2	0	2
Diseases of musculo-skeletal system	0	1	1
Birth injury, difficult labour, etc.	1	1	2
Other causes of perinatal mortality	1	0	1
Symptoms and ill defined conditions	6	12	18
All other accidents	2	2	4
Suicide and self-inflicted injuries	2	1	3
Total all causes	79	73	152

COMMUNICABLE DISEASE

Table A below gives details of cases notified by general practitioners during the past six years and Table B gives details of the age incidence of cases notified in 1969.

TABLE A

Vaccinations	-	-	-	-	59	34	16
Re-vaccinations	-	-	-	-	-	-	32

FAMILY PLANNING

A long-felt need was satisfied when the Family Planning Association commenced their activities in the Borough during the year. Sessions are held at the Clinic, New Park Street on two evenings each month and are well patronised.

WATER SUPPLY

The Town is supplied with wholesome water in a quantity sufficient to meet the needs of the existing population. Should the population continue to rise the requirements of water must naturally rise also. We look to the future in the hope that our Undertaking i.e. the North Wilts Water Board will not be found wanting.

From time to time complaints are received by the Officers of the Health Department about the taste and/or the colour of water in various parts of the Town. The complaints are always investigated. Such investigations are additional to the routine sampling of supplies which is carried out periodically by the Public Health Inspector. The object of such sampling is to subject the water to bacteriological testing. As will be seen from perusal of the report all but one sample so tested gave a satisfactory result.

My reference to water supplies would not be complete if I were to omit mention of fluoridation. I regret to report that so far as this health measure is concerned, the situation remains unchanged from 1968 i.e. fluoride is not being added to our supplies, despite the wishes of our Council.

SEWERAGE

In my report for the year 1968 I dealt in some length with the situation regarding sewage disposal in the Borough.

The arrangements remain unchanged in that the sewage is dealt with by two sewage plants one of which is in the Borough and the other just outside the boundary. The arrangements for sampling and testing the effluent from both plants are in the hands of the Bristol Avon River Authority who report their findings to the Borough Surveyor.

During the year four samples from each plant were tested. The results in so far as the plant maintained by the Borough is concerned were satisfactory on all occasions, whilst two were found to be satisfactory in the case of the plant situated outside the Borough in the grounds of Roundway Hospital.

The matter of sludge disposal continues to cause a problem and it is felt that with the continuing rise in the population, this problem will continue to increase unless and until alternative methods of sludge disposal are brought into operation.

PET MEAT

The sale of meat intended for cats and dogs formerly raised health problems due to loopholes in the existing legislation. I am pleased to report that as a result of new legislation i.e. the Meat (Sterilization) Regulations 1969 which came into force later in the year, the loopholes would appear to have been adequately sealed. I look with some confidence to the future in the hope that purveyors of fresh pet meat, if continuing in business, will elect to operate in areas other than Devizes.

MILK

There are nine licensed milk dealers in the Borough operating from three dairies, five shops and two vending-machines.

Results of cleanliness tests taken of samples during the year by the Public Health Laboratory at Salisbury are shown in the Table below :-

	<u>Pass</u>	<u>Fail</u>
Raw Milk	12	7
Pasteurised Milk	33	3
	<u>45</u>	<u>10</u>

Regarding the failure of the three pasteurised milk samples the Bacteriologist reported the atmospheric shade temperature to be 69°F "just below the void" level when they were tested.

The cause of the failure of four of the untreated samples of milk to pass the cleanliness test was investigated by the Milk Production Officer on the farms concerned and follow-up samples proved to be satisfactory. The failure of the remaining three untreated samples was due to irregular rotation in one of the vending machines. The dealer was instructed to withdraw milk for sale until the faulty machine had been corrected.

Six samples of raw milk were also examined for brucellosis and tuberculosis with negative results.

Bacteriological examination of bottles prepared for filling with milk were carried out with satisfactory results in all cases.

POULTRY INSPECTION

There are no poultry processing premises within the Borough of Devizes.

Food Hygiene (General) Regulations 1960

The number of food premises subject to these Regulations grouped in categories of trades carried on in them is as follows :-

					No. of Premises
Dairies	...	...	...	...	4
Fish Shops (Wet)	...	...	...	...	1
Fish Shops (Fried)	...	...	...	...	5
Restaurants, Cafes, Etc.	...	...	...	...	17

7 unfit houses demolished in High Street (site to be used for Car Park and Shop redevelopment)

1 unfit house closed in St. John's Alley owing to the impracticability of demolition.

10 houses purchased by agreement are situated in the Hare and Hounds redevelopment area.

COMMON LODGING HOUSES

There are no common lodging houses in the Borough.

IMPROVEMENT GRANTS

Discretionary Grants

Applications received during the year	2
Applications approved during the year	2
Grants paid - approved expense	£1,782
Number of dwellings -	2
Amount paid -	£765. 7. 0.

Standard Grants

Applications received during the year	10
Applications approved during the year -	
Owner/occupied	9
Other	1
Grants paid - number of dwellings -	11
amount paid -	£1,238. 17. 9.
Amenities provided :-	
Fixed baths	5
Wash-hand basins	6
Hot water supply -	
3 points	4
2 points	5
Water closets	8
*Sinks	3
*Food storage facilities	3
Additional grant-aided work -	
Number of bathrooms added	2
Number of piped water supplies installed	0
Number of septic tank or cesspool drainage systems installed	0

*The Housing Act 1969 which came into operation on the 25th August 1969 increased the scale of grants and stipulated that the provision of sinks was applicable for grant aid and that food storage accommodation was no longer considered applicable.

WATER SUPPLY

The water supply has remained satisfactory in quantity and quality. Raw samples of water continue to be taken regularly from sources at Shepherds Shore and Bourton by the North Wilts Water Board, for bacteriological testing at the Pathological Laboratory. All reports have been satisfactory.

Samples of water from the Town's mains have been taken from taps both by the Water Board and Public Health Inspector. The unsatisfactory sample was reported to be polluted to a very small degree with non-faecal type coliform organisms only, requiring no investigation :-

	<u>Satisfactory</u>	<u>Unsatisfactory</u>
Results of samples taken by North Wilts Water Board	29	1
Results of samples taken by Public Health Inspector	11	0
Number of dwelling houses supplied from public water mains	3,141

RODENT CONTROL

The Devizes Borough Council continue to share on half-time basis, the services of the Rodent Operative with the Devizes Rural District Council satisfactorily.

77 of the 300 sewer manholes were test-baited. A heavy infestation was discovered in St. John Street and minor degrees of infestations were found at Liberal Club, Chivers' Yard, The Brittox, New Park Street, Wharf Street and the Repository.

Below is a Table extracted from the annual report as supplied to the Ministry of Agriculture, Fisheries and Food for the year under review :-

	TYPE OF PROPERTY	
	Non-Agricultural	Agricultural
<u>PROPERTIES OTHER THAN SEWERS</u>		
1. Number of properties in district	3961	12
2. (a) Total number of properties (including nearby premises) inspected following notification	64	0
(b) Number infested by		
(i) Rats	58	0
(ii) Mice	6	0
3. Total number of properties inspected for rats and/or mice for reasons other than notification	1552	3
Number infested by		
(i) Rats	46	3
(ii) Mice	9	0

The Rodent Operative also dealt promptly with complaints arising from infestations of wasps, woodworm, moles, ants, cock-roaches, woodlice and flies.
